STATINTL

 Project #42

Mr. Echols mentioned today that Colonel White had requested some sort of a publication to encourage internal JOT applications.

Mr. Echols said he had told Colonel White that we had already in the mill something to stimulate the internal recruitment of JOT's. He asked where we stood at present on this project. I estimated that we could have things ready to go in two or three weeks and possibly sooner if this was considered a priority project.

Mr. Echols said that he felt that we should give this project high priority now. He commented that our only chance of meeting the quota for the next JOT class would be through the additional efforts to recruit a number of JOT's internally.

Please review with me where we stand on this project now.
